For immediate release

Explosive growth for MindIQ!

MindIQ Corporation, formerly Bernstein & Associates, shows the world its "staying power" with its current growth and expansion.

Norcross, GA, July 28, 2000: MindIQ, an Authorized Independent Compaq Training Provider, has matched its total 1999 sales revenues during the first six months of 2000. Net income increased over 800%. Evident by its current growth, the company is projecting a 110% increase in revenues by the end of 2000, while keeping a 47% gross profit margin. The company credits its success to its superior instructor-led training along with its other growing product lines. "We are extremely pleased with the results and with the momentum we have. Our exceptional people have really delivered for us," boasts Louis H. Bernstein, CEO.

The company is currently developing new training technologies, scheduled for release later this year. MindIQ is now seeking equity investment to accelerate the company growth.

About MindIQ...

MindIQ Corporation, an instructor-led and technology-based training/security consulting company, is a 14-year-old "startup." MindIQ is a pioneering provider of IT training and consulting services in a wide range of technologies. From on-site instructor led technical training to design and implementation of a Java-based Internet training application, MindIQ helps its customers develop successful technology training and system security solutions. MindIQ is organized into three distinct business groups:

- ?? Instructor-led Training Group - Provides on-site instructor-led training in a variety of technologies, including OpenVMS, UNIX, Windows NT, programming languages, and database technologies.
- ?? Technology-based Training Group - Develops custom courseware solutions for delivery via CD-ROM and the Internet.
- ?? Security Consulting - Offers a range of system security services ranging from full penetration studies to on-going security support.
